

**Fair Haven
Shade Tree Commission**

RESIDENT TREE BUYING PROGRAM

Spring 2024

In partnership with **Fernbrook Nursery
Bordentown, NJ**

Fair Haven Shade Tree Commission is proud to offer our second Resident Tree Buying Program! Locally grown, professionally planted, guaranteed for 1-year.

Orders Taken: March 4-25
Trees Planted: mid-May

HOW IT WORKS

RESIDENT TREE BUYING PROGRAM

\$270-\$385 PER TREE DELIVERED AND PLANTED

- Residents pick trees from a list of available options
- Price includes delivery and installation on your property on a date determined by the Borough and Fernbrook in mid-May.
- Residents do not need to be present for planting but it is highly encouraged.
- Trees are guaranteed for 1-year.
- Residents may order as many trees as desired.
- Planting locations will be informed by utility mark-outs to ensure nothing is planted by gas or water lines.
- Residents are responsible for marking sprinkler lines.
- No planting in the Borough right-of-way.
- Participating residents will make payment directly to Fernbrook Nursery on the day of planting(s) and make checks payable to "Fernbrook Nursery".
- See the tree list below for availability, size, and description to pick out the perfect tree(s) for your property.

FERNBROOK GUARANTEE

ALL TREES ARE DELIVERED AND PLANTED BY FERNBROOK NURSERY

GUARANTEE

All plants shall be guaranteed to be in a satisfactory growing condition and to live for a period of 1 year from planting except in raised pots or planters, plants under any overhang, plants receiving mechanical damage, plants damaged by an act of God, plants subject to extreme weather conditions not typical of the area. All plants that fail to survive under the guarantee shall be replaced once at the end of the guarantee period with the same type and size as originally specified. The cost of replacement shall be for the labor only on an hourly basis. No cost shall be charged for the plant material.

SHADE TREES

Swamp White Oak

Oak trees are the single best tree to plant if you want to support the ecosystem. Oaks support more life-forms than any other trees in North America. The Swamp White Oak grows well in wet soil but just as well in drier soils. Full sun. It is very long lived at 300 plus years. Moderate grow rate reaching 60' with a 50" spread. This is a native tree.

Commemoration Sugar Maple

Dark green foliage, oval growth habit. Orange, coppery-bronze and red in the fall. Full sun to part shade. Fast grower reaching 40-50' in height with a 30-40' spread. This is a native tree.

ORDER FORM

SHADE TREES

European Beech

Considered the finest specimen tree for its year-round beauty. Dense canopy of shimmering green leaves that turn a golden bronze color in the fall. Full to part sun. Slow to medium growth rate will reach a height of 50-60' with a spread of 35'.

Kentucky Coffeetree

Upright arching branches give this tree a unique growth habit that forms a narrower crown. This is considered a tough species because it tolerates variable conditions.

This variety is seedless. Good fall color. Full sun. Slow to medium growth rate will reach a height of 50' with a spread of 35'.

This is a native tree.

ORDER FORM

SHADE TREES

Sweetgum (fruitless)

Happidaze Sweetgum is a fruitless variety of the gum tree. This is a highly symmetrical tree, glossy foliage turns dark red to purple in the fall. Full sun. Medium growth rate will reach 60-80' with a spread of 40-60'. This is a native tree.

ORDER FORM

FLOWERING TREES

Rancho Sargent Cherry

Rancho Sargent grows in a vase-like shape with a narrow crown. Fragrant pink flowers in the spring. Reddish bronze new foliage turns green. Good fall color. Great in smaller landscape areas. Medium growth rate reaching 20' in height with a spread of 10'. Full sun.

Winter King Hawthorn

Winter King Hawthorn is a great accent tree. Winter King has profuse clusters of white flowers in mid-spring to early summer. The glossy, pointy leaves turn purple and scarlet in the fall. The fruits are showy red berries carried in abundance from early fall right through to late winter. Full Sun. Grows 20-30' and rounded in habit.

ORDER FORM

FLOWERING TREES

Merlot Redbud

Smaller variety of Eastern Redbud, a favorite ornamental tree. Lavender-pink flowers in the spring followed by dark purple leaves that are thick and glossy. Moderate grower in full to part sun. This tree will reach 12-15' in height with a similar spread. This is a native tree.

ORDER FORM

EVERGREEN TREES

American Holly

The American Holly is considered one of the most popular trees in the world and the tree is ridiculously tough. The American Holly is widely known as the hardiest broadleaf evergreen. Slow to medium growth rate. A male pollinator must be nearby in order to produce the beautiful red berries we are all familiar with on female trees. Grows 25-60'. This is a native tree. Deer resistant.

Elegantissima Arborvitea

Conical to narrow pyramidal shaped evergreen with dense green foliage and yellow tips. Great hedge and great for privacy. Full sun. Not as tall and wide as other arborvitea varieties. Will reach height of 15' with a spread of 5-10'. This is a native tree.

ORDER FORM

EVERGREEN TREES

Robusta Green Juniper

Robusta Juniper grows in an irregular form and makes an interesting specimen tree in landscape design. It has blue green foliage in dense tufts. Drought tolerant and low maintenance. It's narrow upright form make it a good choice for small spaces. Prefers full sun. Reaches 12' high with spread of 6'. Deer resistant.

Hillspire Juniper

Dense, compact-pyramidal, symmetrical tree with bright green foliage. Drought tolerant. Commonly called Eastern Red Cedar this is the male form that produces no berries. Good for screening. Grows 20' in height with a spread of 8'. Full sun. This is a native tree and is considered deer resistant.
